

COMMUNICATIONS REGULATORY AUTHORITY OF NAMIBIA

CRAN invests in IDU
for functionally rich, cost effective and user friendly financial management.

Broadcast

CRAN SELECTS IDU

CRAN uses the Financial Budgeting, Financial Reporting and Analytics Modules of IDU. They purchased the system in April 2014, after looking for a cost effective, online financial management solution, that would allow them to easily administer the system with little ongoing IT support.

CRAN has found IDU-Concept Administrator simple to manage and use, there has been no need for IT or system development skills and very little need for ongoing support. Managing their own system has meant a huge cost saving to their business.

ABOUT CRAN

CRAN is the official regulator of the Namibian communications, broadcasting and postal services sector. CRAN was established by the Communications Act 2009 (Act 8 of 2009).

CRAN is governed by a Board of Directors with six members and their mandate is to regulate electronic communications and communications by postal service.

"IDU is a user friendly system with amazing functionalities. The software has really made our work processes more efficient." Says Maria Moses Manager: Management Accounting at CRAN.

RECODES AND ACCRUALS

CRAN have been particularly impressed with the Recodes and Accruals functionality within the IDU Reporting modules.

IDU's Recode functionality allows users to request the reallocation of journal entries posted to the general ledger directly from the Financial Reporting Module and the Accruals functionality allows the user to have the ability to create accrual entries at a cost centre level for items that they feel have not been accounted for.

"The IDU helpdesk is very efficient and any user queries are addressed as soon as possible"

I would highly recommend IDU, the system offers functionalities that meet the needs of businesses, it is highly responsive and also very cost effective."

ABOUT IDU

IDU delivers top of class packaged budgeting, forecasting, performance management and reporting tools to simplify financial management. Our flagship product, IDU-Concept, provides easy, effective budgeting and financial reporting for medium-sized to large businesses. IDU-Concept integrates easily with ERP software, but unlike more cumbersome offerings, IDU-Concept can be implemented quickly, requires little or no ongoing consulting fees and reduces budgeting cycles from months to weeks.
